EXPERIENCE

Frazier Industries, LLC

Bakersfield, CA

Owner/CEO

01/08 - Present

- Developed a life monitoring and alert system for vulnerable individuals; provides notifications to designated support systems when routines change, or assistance is required.
- Designed and built a diversified \$100,000/year business providing IT services to local businesses.
- Hired, supervised and motivated administrative personnel and IT support technicians.
- Supported local businesses with IT (Windows Vista, Windows 7, Windows 8, Windows 10, networking, VoIP, databases, website development and maintenance).

Project Highlights

- Managed the entire production to build a comprehensive data and communications infrastructure within new corporate construction; worked with contractors, installation of combined phone and data cables, installation of Wi-Fi, 24/7 surveillance and hardware for all offices, firewall installation and a complete sync of all data and communications across multiple facilities.
- Created a robust client relationship management platform to help organization strategically manage and develop opportunities; tool includes demographic information, note taking functions, account management designation, and reporting; integrated phone system for ease of recording and reporting.

California Resources Corporation

Bakersfield, CA

Programmer

10/17 – 05/19

- Designed and developed front end web interfaces for SQL databases, migrated storage from Excel to web applications and increased data integrity, uniformity and functionality.
- Developed scripts to synthesize, integrate, and analyze information in SQL tables and generated reports for management to support data-driven decision making.
- Implemented Git, a source code repository system, to intelligently merge code from multiple developers' code; removed redundancy and improved documentation of updates.
- Managed IIS web server and hosted developed applications on IIS and SQL server 2008;

expanded access to modify and manage company data simultaneously without interference.

California State University, Bakersfield

Bakersfield, CA

Student Affairs Division, Student Technology Consultant

09/07 - 12/08

- Utilized Faronics Deep Freeze, C-Sharp and MySQL to plan and design a new computer lab for the residence halls including a custom login mechanism for 24/7 access.
- Ensured safety of residents by researching, planning and implementing an Emergency Response System using HTML / CC, C-Sharp, My Sql, Kerio Mail Servers and Microsoft Windows Server 2003.
- Converted several calendaring systems to create one central dynamic calendar for university stakeholders including an option to subscribe to organizations and events by text or email.
- Designed a package notification system for the residence halls alerting students via text message or email regarding receipt of packages.
- Worked directly with client to develop a Student Conduct website using HTML and CSS.
- Maintained Windows Server 2003 to conveniently host several services at once.

California State University, Bakersfield

Bakersfield, CA

Career Development Center, Student Technology Consultant

06/07 - 12/08

- Customized and implemented a new comprehensive career management system, RunnerLink, used by 2000+ students and 800+ employers.
- Created the department logo and contribute to an aggressive outreach campaign by maintaining the department website using HTML and CSS.

Information Technology Services Department, Student Technology Assistant 02/07 – 09/07

- Prepared various computer systems to be distributed to faculty and staff. Prepared computers with Windows XP and Mac OS X.
- Developed new skills through extensive training for implementing new policies such as Active Directory.
- Implemented new technologies such as Universal Imaging to help users accomplish goals faster and more efficiently.

Maricopa Unified School District

Maricopa, CA

Assistant Network Administrator

08/02 – 09/06

- Maintained Windows 2000 and 2003 servers including web, file, game, DHCP and backup servers using software applications including: remote management software, backup software and custom developed applications to isolate changes made to the system.
- Combined outstanding analytical and technical skills to assist with the detection and repair of network issues and performed troubleshooting on workstations and servers.
- Improved system security conditions by introducing imaging and desktop security software throughout the campus including the identification and elimination of flaws in the software.

Taft College

Taft, CA

Student Assistant

08/05 – 07/06

- Managed security software project from inception to actualization. Researched, tested, debugged and developed security software using Visual Studio.NET and Microsoft Windows 2000 and XP.
- Demonstrated excellent critical thinking skills by troubleshooting PC, Mac and Linux workstations resulting in increased efficiency and system reliability.
